WOOD CARE ROUTINE

Wood is a living honest material which needs regular care and love. As you know, it can get dry and sometimes liquids can make ugly marks. We have developed a simple routine to help you clean and care for your wood pieces, tables, chairs, sculptures and more, to make things last.

Act of Caring has developed this simple routine to help you clean and care for your wood piece.

1.
Use our Reviving Wood Cleanser on a daily basis. Spray directly on the surface and wipe with a damp cloth. Let it dry. The cleanser contains soap with a high PH value and no harmful chemicals.

2.
Use our Nourishing Wood Oil to nourish the wooden surface. Take a sponge or dry cloth and apply oil in circles over the whole piece. Once covered with oil let sink in and then wipe off the excess oil. Polish with a clean dry soft cloth.

The oil contains only natural ingredients and will preserve your piece by a deep penetration of the wood. It will nourish and protect it from water leaving a lovely scent of forest in your room.

Don't be afraid to use the excess oil on your hands.

Wood oil can be used on all kinds of wood that has been treated with oil before.
Do not use it on hard-waxed surfaces.

*Always try the oil on a small area before applying to the whole piece.

Tip! Repeat the routine as often as needed.

Recommended products to use: Reviving Wood Cleanser & Nourishing Wood Oil .
